opportunities to enter professional fields in the lives and careers of women who entered the architecture profession in the Pacific Northwest between 1920-1980. By studying this collection of personal narratives, it is my hope to reveal the experiences that a woman in pursuit of her dreams.

These events further brought to light the social and political issues that led to change in the architectural profession, but also revealed efforts to bridge the gap in the enactment of this law. These events further brought to light the social and political issues that led to change in the architectural profession, but also revealed efforts to bridge the gap in the enactment of this law.
